

# SOCIAL NETWORK

BY:

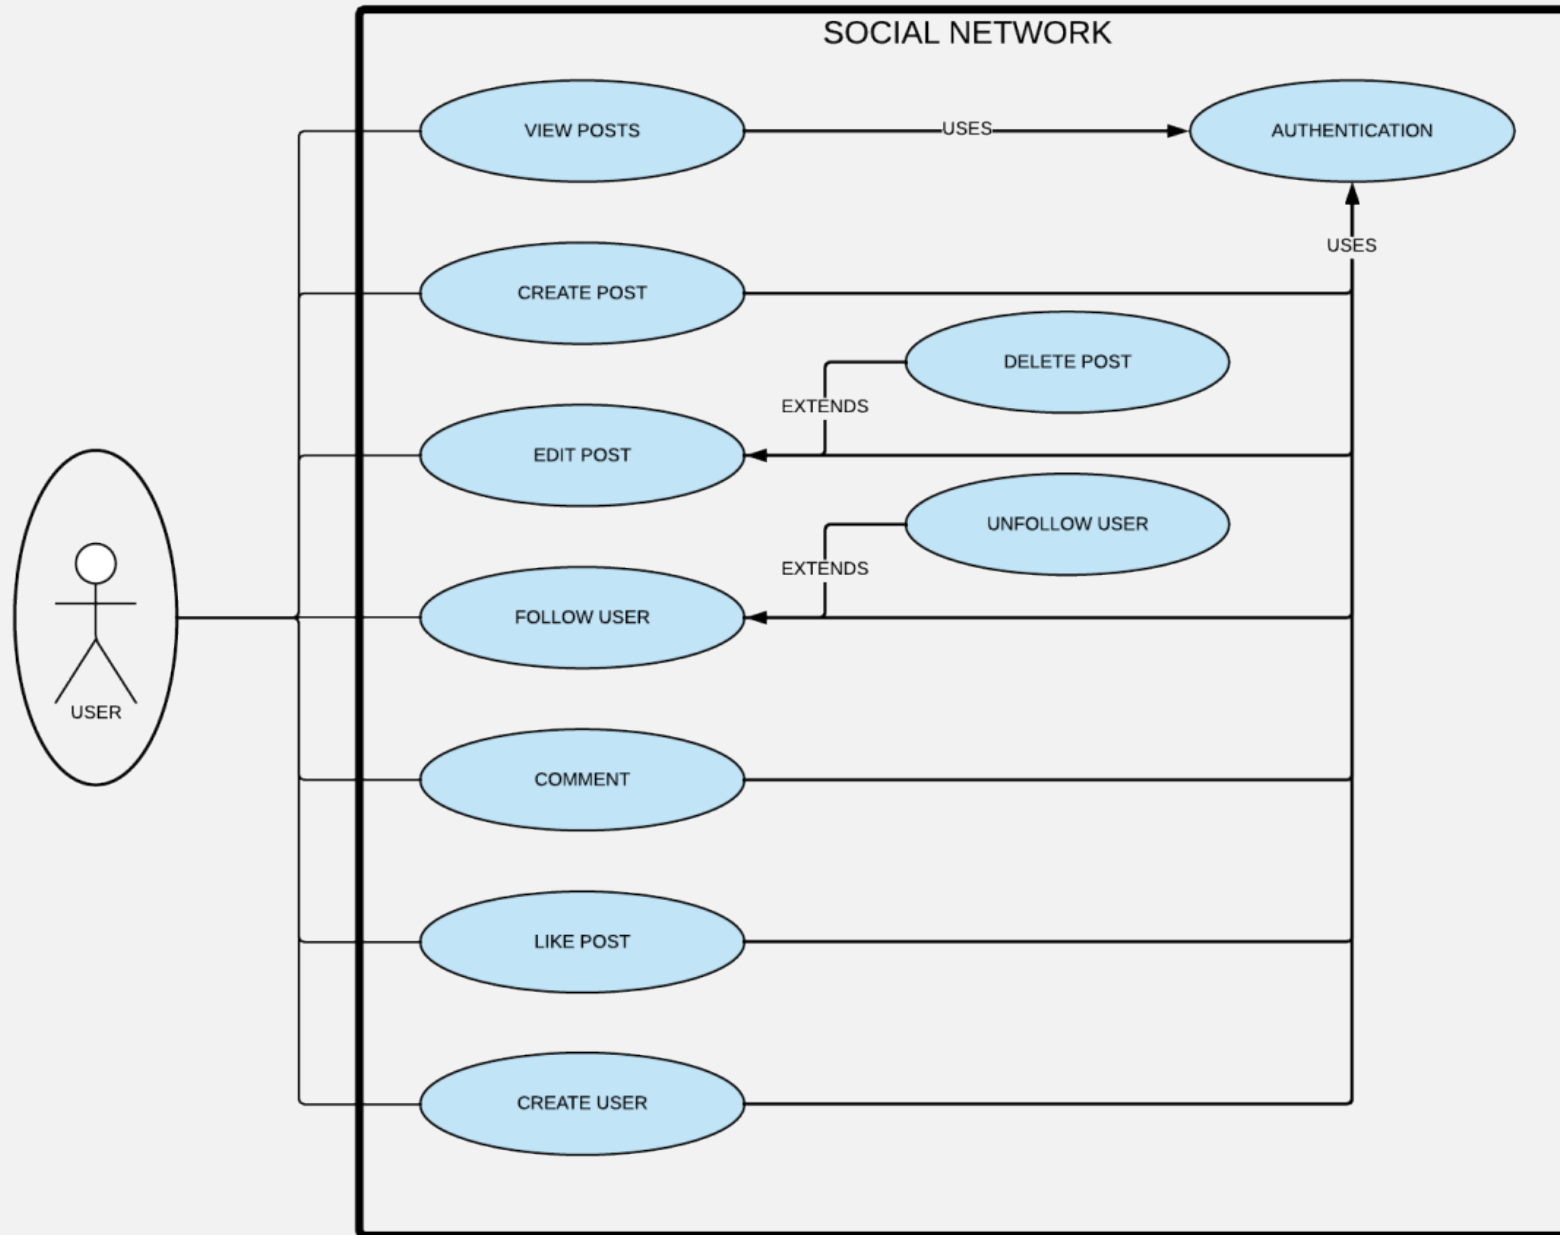

CHRISTINE BRECKENRIDGE

RYAN GRIFFIN

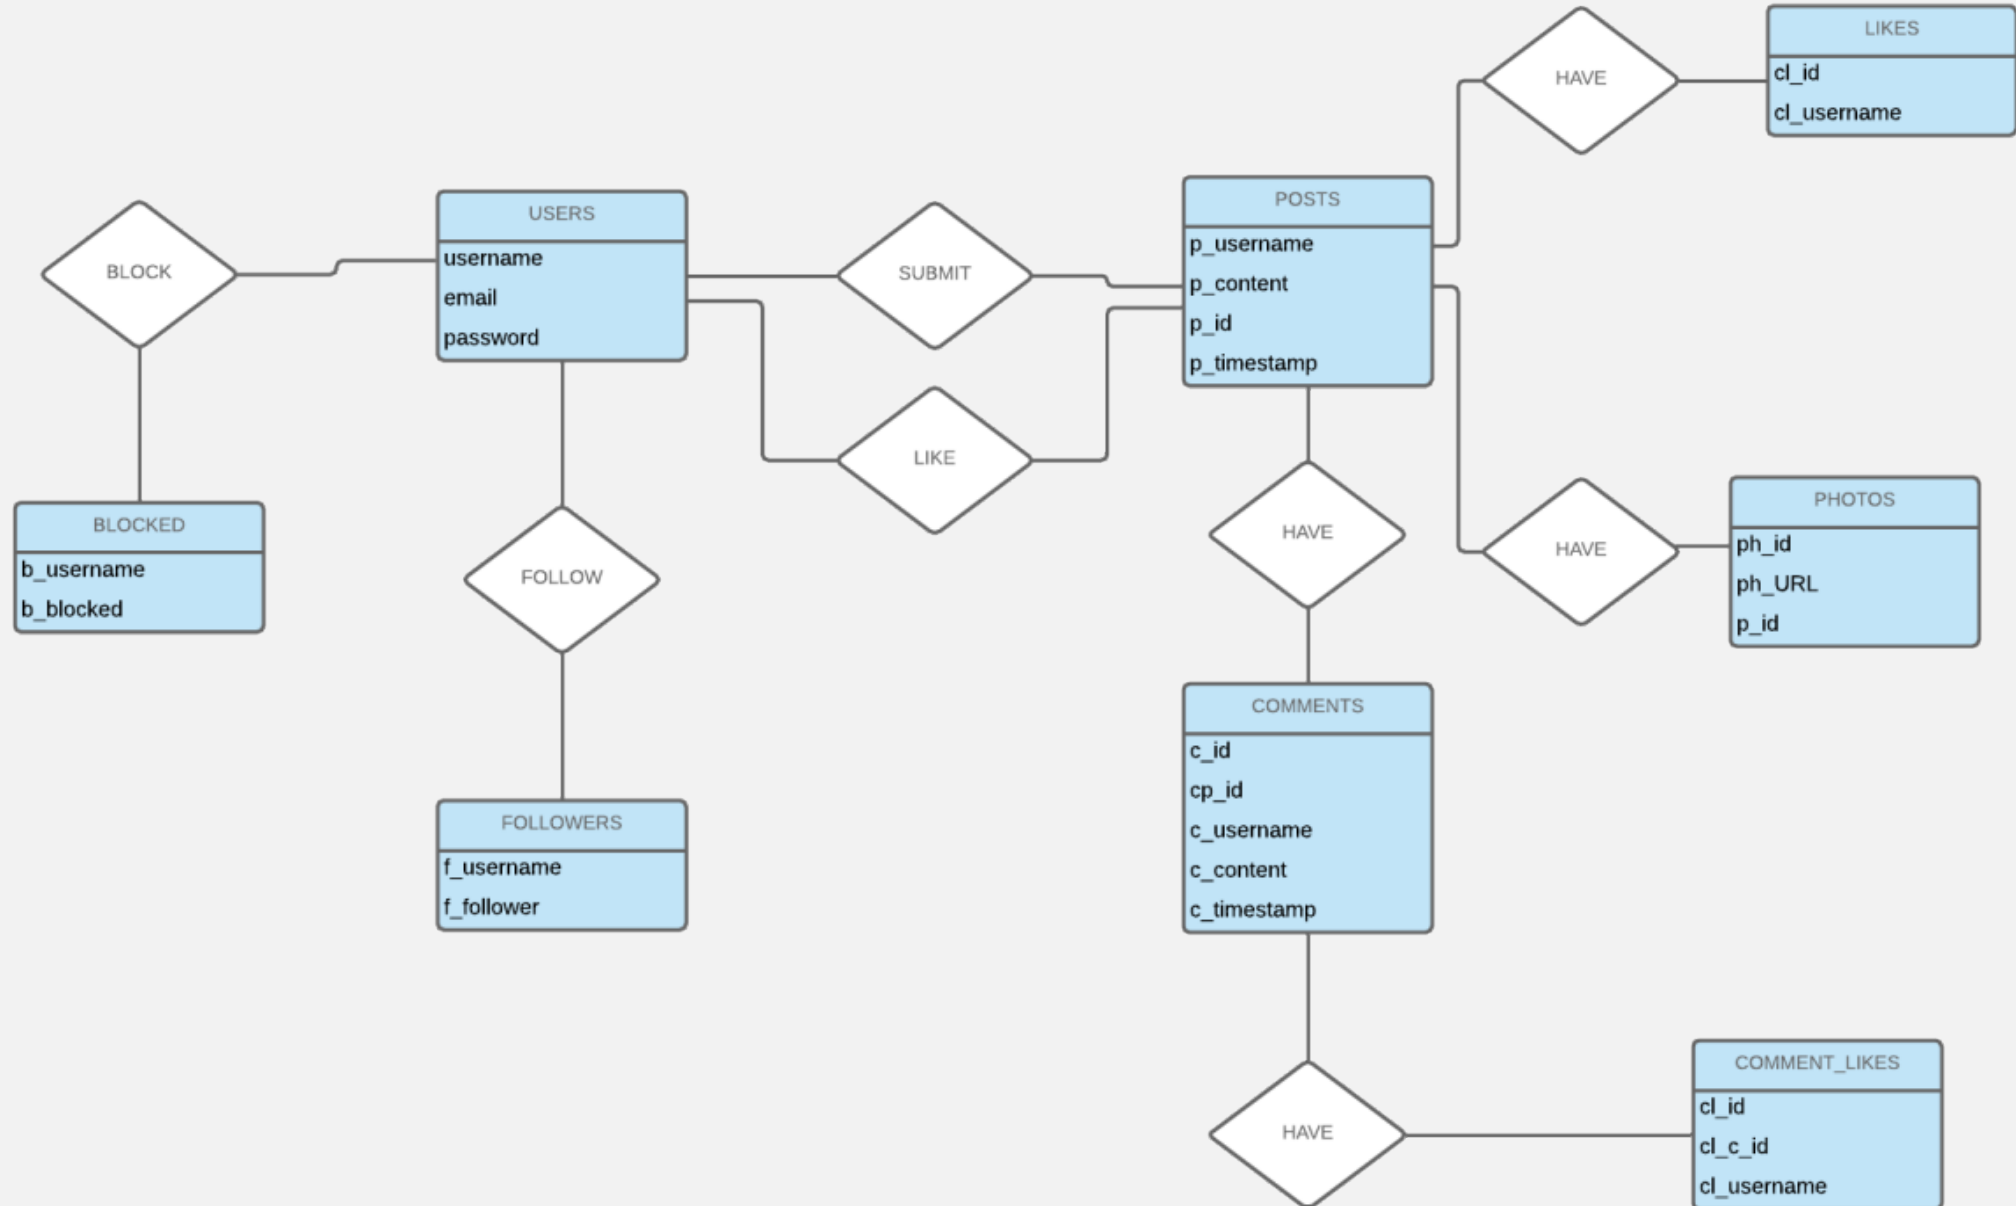

# SYSTEM DESCRIPTION

- Our project is a simple social network.
- Users make posts and follow other users.
- Each user's home screen displays a unique sequence of the posts of whomever the user is following.
- Users can provide comments on posts.
- Users can like posts.

# USE-CASE DIAGRAM

# E/R DIAGRAM & SCHEMA

## IMPLEMENTATION DETAILS

- We used MAMP and phpMyAdmin to host and manage our MySQL database.
- The site was built with PHP which connects to the MySQL database and can insert, update, and delete tuples.
- By querying the database in PHP we can retrieve data to display in HTML to the user and allow the user to interact with the site.
- Used Bootstrap for CSS
